Re: *Groundwater and Surface Water Monitoring*  
*Seaboard/Riverdale Landfill Site*  
Guilford County, Permit #41-01

Dear Mr. Babb:

The Division of Waste Management has reviewed the *October 24, 2008 Groundwater and Surface Water Monitoring* letter submitted for the Seaboard/Riverdale Landfill Site. Per our phone conversation on October 23, 2008 and the October 24, 2008 letter, the next required groundwater and surface water monitoring event would occur in the Spring of 2009 that would consist of the sampling and analysis of 65 groundwater monitoring wells and 8 surface water locations as specified in the *Pre-Remedial Groundwater and Surface Water Monitoring Plan*. As a result, the request is approved as described. If the proposed settlement agreements are not finalized and signed during the Spring of 2009, then the City of High Point and the Seaboard Group are required to conduct a limited groundwater and surface water monitoring event during the first half of 2009. This sampling event should be similar to the groundwater and surface water sampling event performed in 2007. Please call me at (919) 508-8500 if you have any questions or concerns regarding this letter.

Sincerely,

Jaclynne Drummond  
Hydrogeologist  
Environmental Compliance  
Solid Waste Section
